SILENCE DROWNS THE SCREAMS

As a group of volunteers, we are dedicated to creating and developing resources and tools for research that uncover how individuals in positions of power and influence are exploited. These individuals are selected and leveraged based on their involvement in paedophilia, allowing for control through fear, threats of blackmail, character assassination, or staged suicides/murders.

Our mission extends beyond seeking justice for sex crimes, from grooming child victims to Satanic Ritual Abuse (SRA). More importantly, we are committed to exposing and bringing justice to the system that positions young adults as paedophiles. This includes the deliberate enticement of paedophiles into situations where they are coerced into acts of sexual abuse against trafficked children, often recorded secretly or threatened with charges by their victims if they disobey their handlers' globalist agendas.

We understand that exposing these crimes can be perceived as a national security concern, which is why there is minimal litigation against those higher up the chain of these assets and handlers. We suspect that this perversion for power is widespread among those in seats of power and influence. Prosecuting everyone involved in these dark acts could potentially cause the collapse of governments, including that of the United States, and attract scrutiny from other nations. The resulting power vacuum could invite numerous coup d'état possibilities, potentially threatening individual freedoms, liberty, and the pursuit of happiness.

We also recognize that this perversion is used as a technique to cause depersonalization in victims, shaping them into assassins or patsies.

We are deeply concerned about the social ramifications of this type of abuse, particularly its role in the proliferation of paedophilia.

We believe it is also used for social mind control, orchestrated by cultural influencers in popular media, from Hollywood and Disney to its pervasiveness in the music industry.

With our motto, "Silence Drowns the Screams," we propose the opportunity for those in power who have been tooled by this perversion to investigate and prosecute their handlers and placemakers on a global scale before the International Criminal Court.
